SUGGESTION REPORT

SUGGESTIONS FOR THE NEXT PERIOD OF TESTING

- Introduce a dummy gift coupon feature for testing purposes. This allows users to experience the application with simulated discounts.
- Reduce the steps required to complete the checkout process and simplify the process to make it shorter and more user-friendly.
- Integrate popular payment gateways such as PayPal, credit/debit cards, and net banking
- Implement a feature allowing users to save their progress during checkout and resume later.
- Automatically calculate and display shipping costs based on the user's location as they enter their address.
- Provide users with a way to track their orders after purchase by integrating with shipping carriers.
